Cumulative Index

Need to find something published earlier this year in *AATCC Review*? The index can help you find it quickly either by author or by subject matter.

For example, if you know that the article you are looking for was written by Brown, a check of the index of authors shows that Philip J. Brown is the author of Title 53. The index of titles, in turn, identifies Title 53 as "Crosslinked Electrospun PET Webs" and shows that it was published in the July issue (7) beginning on page 28.

If you don't know who wrote the article, you can locate it by using the key term index. You know, for example, that the article reports on *crosslinking* and *polyester*. Finding either of these terms in the key term index will give you the title numbers of all articles published this year pertaining to those terms.
